Education

Certificate of Software Development,
Moringa School
04/2022 – present | Nairobi, Kenya
I was a scrum master for a team of 6 whereby we created a fully functioning web application, both back end & front end. I made key design and technical decisions resulting in the project receiving the first prize.

Skills

Frontend development *(With React js)*,
Object Oriented Programming *(Ruby & Ruby on rails framework)*,
Agile principles *(The pillars of scrum theory)*,
SQL *(SQL,MySQL & PostgreSQL database)*,
UI / UX implementation *(Conversant with Figma)*,
Version Control Systems *(Proficient in using Git)*

Interests

Writing and reading technical articles,
Photography and videography,
Listening to music & video gaming,
Outdoor sporting activities like football

Projects

Dynamic Websites & Web Applications
I have developed web applications with Reactjs and Ruby on Rails. Some of my personal projects include;- **Turf booking app** where teams can book football turfs within Nairobi. I have also developed **Tastebite app** which is a recipe-sharing app. The source code can be found on my GitHub.

Courses

Creativity Boot Camp,
Linkedin Online Course ⬈
04/2022
In this fun, hands-on course, creative director Stefan Mumaw guided me through five interactive training exercises that helped me boost my creative output and produce even more innovative ideas.

Leading yourself, *Linkedin Online Course* ⬈
07/2022
In this course, I learned how to manage my mindset, behaviors, and workplace relationships to help me stand out in my organization and in my industry as a leader

Teamwork Foundations,
Linkedin Online Course
07/2022
I learned the qualities of effective teams and the role I play in creating a healthy, productive team in this course taught by management trainer Chris Croft

Profile
